Phlox Columbia

A WAYSIDE GARDENS PRODUCTION

U. S. PLANT PATENT No. 118

AFTER growing this variety you will agree with every person that has seen it, that it is the greatest Phlox ever introduced. Its strength and vigor is something rarely seen in plants. A well grown, two-year-old plant will produce from six to fifteen flower spikes. The foliage is rich dark green, leaves covering the stems down to the ground. Mildew is unknown to this variety. The flower stalks are about 2½ feet high, stiff and erect. The flowers, when cut, last over a week in water.

MRS. FRANCIS KING, America's great garden authority, writes of this Phlox as follows: "Columbia, the new cameo-pink Phlox which has just risen on the garden horizon is of most exquisite beauty. A soft pink recalling that of Elizabeth Campbell but lighter, more delicate, and with an eye of light blue which has a charming effect upon the general color of the flower, this Phlox grows to 2 or 2½ feet, very bushy, and, a fact most marvelous, it has no enemies. Red spider does not visit it, mildew does not cover it, it is entirely pest-free and flourishes after the coldest winter and in the hottest, driest summer. Altogether, an amazingly good addition to the list of plants which give color and richness to the mid-summer border."

Remarkable New Barberry

Berberis Mentorensis—U. S. Patent No. 99

STAYS GREEN PRACTICALLY THE ENTIRE YEAR

Remarkable is just the word for it. Every once in a while a new plant is created of such outstanding merit that it takes the country by storm.

Today we have in our nurseries several thousands of just such a wonder, called *Berberis Mentorensis*. So distinctly different and so superior to other hardy Barberries, that the U. S. Government granted us a patent on it.

There are five outstanding points of superiority about this Barberry:

First—it is evergreen practically the year around. Think what that means.

Second—its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—when used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.

Fourth—needs practically no pruning. Observe its erect growth which becomes dense when the plant is three or four years old.

Fifth—combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

A very important trait of this Barberry is that it is not "choosy" about where it grows. No matter if you can't make other broad-leaf evergreens, such as Azaleas and Rhododendrons, thrive in your soil, this new Barberry will. It is equally at home whether it is acid or alkaline soil.

Realizing the merit of this Barberry, we have first grown a liberal quantity of plants before offering it, so that we would be able to sell this handsome new plant of unquestionable merit at moderate prices.

A-No. 1 plants, 18 to 24 inches tall, with abundant roots: Three \$1.20, Doz. \$3.50, 100 \$25.00.

Bushy plants, 24 to 30 inches tall: Three \$1.60, Doz. \$4.50, 100 \$35.00.

P. S.—Allow us to again say, it is the nearest reasonable cost perfect shrub for foundation planting and hedges that we know about.

New Dwarf Hybrid Border Asters

(Aster Dumosus Hybrids)

The new dwarf Asters are unquestionably among the most worth while plants that have recently come to us from England. Very neat in habit with attractive foliage and in September and October are graced with hundreds of blooms of the most delicate shades of lavender, pink and lilac. Not one person who saw them growing in our nurseries but admired them and purchased some.

They have been tested for three years in our nurseries and we as well as all those who have seen them proclaim these new things to be of exceptional value and merit. Perfectly hardy and grow most anywhere in any reasonably good garden soil.

NEW WINTER HARDY

Hybrid Korean Chrysanthemums

These new creations are especially fine for cold climates where the ordinary Chrysanthemum winter-kills. As stated before, they are hardier, most attractive in color, very early, blooming early October, easier to grow, and more profuse in blooming.

The lovely new pastel shades, which simply defy accurate description or true color reproduction, suggest the Gerbera in their daintiness. Cut with short stems, they make the most charming table decorations, yet are capable of striking decorative uses if the entire branching sprays are used. They are compelling for color effect in the garden.

Count Zeppelin Three \$0.55, Doz. \$1.50, 100 \$10.00
(Graf Zeppelin). Pure white flowers with vermilion-red eye. A striking, clean looking Phlox. There is no fading or suffusing of color. Considered the best of the so-called calico types. Very free-flowering, and a good grower. The plants reach a height of about 30 inches.

Daily Sketch Three \$1.40, Doz. \$4.00, 100 \$30.00
This variety possesses compelling beauty. It is vigorous in growth and reaches a height of about 3 feet. The flower trusses are enormous and the individual florets are extra large. Color, salmon-pink with vivid crimson eye. A splendid and worth-while English novelty.

Elizabeth Campbell Three \$0.75, Doz. \$2.00, 100 \$15.00
Light salmon-pink with lighter shadings toward the center of flower. Decidedly the finest Phlox of this color, but unfortunately, a weak variety and slow grower, requiring more care and attention than most varieties.

Enchantress Three \$0.55, Doz. \$1.50, 100 \$10.00
Bright salmon-pink with dark eye, resembling Elizabeth Campbell in rich green, glossy foliage.

Ethel Pritchard Three \$0.75, Doz. \$2.00, 100 \$15.00
A delightfully French-mauve colored Phlox, which, if seen on a cloudy day, looks almost as pale blue as our native Phlox Divaricata. It is a strong grower, flowers freely and should be planted with white or yellow flowers to look its best. Fairly tall grower.

Europa Three \$0.55, Doz. \$1.50, 100 \$10.00
White changing to a pale blush-white toward center with a red eye. This variety is similar to Count Zeppelin but has a light pinkish cast to it. Produces large heads freely and is a good, strong grower of medium height.

Jules Sandeau Three \$0.55, Doz. \$1.50, 100 \$10.00
Rather dwarf in habit, but producing very large heads of brilliant watermelon-pink blossoms. An outstanding variety because it flowers more freely and longer than most Phlox, and is practically free from red spider. We consider it the best of its color.

Leo Schlageter Three \$1.20, Doz. \$3.50, 100 \$25.00
Seldom has one seen a shade of red such as is produced by this fine new Phlox. Its brilliant scarlet blooms seem to glow with fire. This impression is heightened by the fact that there seems to be a decided orange cast to the blooms. Of splendid habit, about 3 feet high with full rich heads of bloom early. The best red Phlox in existence today.

Lord Raleigh Three \$0.40, Doz. \$1.00, 100 \$7.00

Miss Lingard Three \$0.65, Doz. \$1.70, 100 \$12.00
This variety is not a Decussata type like all the others in the list, but a Suffruticosa. The distinguishing marks are that it flowers a month earlier than the Decussata sorts. Has beautiful, long, shiny green foliage, and is absolutely free from any disease. It flowers from early June until October with large heads of white flowers with faint pink shadings in center. It is the best early white Phlox known.

Miss Verboom Three \$1.00, Doz. \$3.00, 100 \$20.00
We consider this one of the best new Phlox. Its greatest contribution is its early flowering. This in fact, is the rose form of Miss Lingard. Habit and foliage are the same; flowers early in June.

Mrs. Jenkins Three \$0.40, Doz. \$1.00, 100 \$7.00
(Independence). Pure white; late flowering; grows very fast and is of medium height. A splendid sort for planting in masses. Few varieties equal its free-flowering habit. Free from any disease and can always be depended on. An old sort but worth while.

We have a booklet on their culture, which will be sent to you upon receipt of 25c. Because of the lack of knowledge and the carelessness of many planters, we do not guarantee Lilies to grow. Bright orange flowers are carried upright; very hardy, thriving in any soil in a sunny garden border or among shrubs in half shade. Is at its best toward the end of June and early July. It grows as well in a city plat as in a country garden, while its leaves show by their deep green color, and the whole plant by its robust health and vigor, how little it worries about conditions.

Groups of this noble Lily in woodland or wild gardens produce a grand effect. It requires to become established before flowering freely and thrives best where there is an abundance of leaf soil. LILIES—Continued.

Hanson Each \$0.40, Doz. \$4.00, 100 \$30.00
Most desirable, not particular in its cultural requirements and extremely handsome in flower; does well in light loam. Plant among low plants to protect young shoots, this being one of the earliest Lilies to appear in spring. Does as well in thin woodland as it does in the border. Height 4 to 5 feet, carrying blossoms 2 inches across regularly reflexed, the petals being of a bright orange-yellow, spotted more or less with brown; of a waxy texture. June flowering.

Henry Each \$0.30, Doz. \$3.00, 100 \$20.00
A splendid garden plant, vigorous in its growth, failing very seldom. One of the best border Lilies, reaching over 8 feet and more in height when established, and bearing more than twenty flowers of a rich, deep, orange-yellow. Fine foliage. Does well in both light and heavy loam. A partially shaded place, sheltered from high winds, suits it best. It is a beautiful Lily. August-September flowering.

Humboldt magnificum Each \$0.55, Doz. \$5.50, 100 \$45.00
Erect stem, with whorls of leaves. Numerous drooping flowers borne in loose, triangular clusters of brilliant golden yellow, spotted with purple on the reflexed petals. It produces a splendid flowering plant; five feet high.

Japonicum Each \$0.35, Doz. \$3.50, 100 \$25.00
(Formerly listed as Krameri). This is one of the few "pink" Lilies of our gardens, and a very lovely thing it is. The flowers are carried horizontally on stems 3 feet high. Somewhat capricious in its requirements. It is a Lily so beautiful and of a color so lovely and unusual that it is worth taking pains with. It has been known to give as many as seven blooms to a stem, though one and two flowers to a stem the first year is usual. The funnel-shaped, finely formed flowers are six inches or more in length, and as much across, of a beautiful clear pink color often shaded blush. June-July flowering.

Longiflorum giganteum (Japan Easter Lily). Each \$0.35, Doz. \$3.50, 100 \$25.00
This Japanese type is highly thought of for late winter and Easter forcing—though the bulbs of this variety are often carried over in cold storage to be brought into bloom at any desired time the succeeding year. The plant is of sturdy, stocky growth—with black marked stems. The flowers of purest white are the largest of the Longiflorums. For shipment October to December. Extra bulbs. 9 to 10 inches.

Longiflorum Harrisii (Bermuda Easter Lily).
Extra bulbs, 7-9 in. circum. Each \$0.30, Doz. \$3.00, 100 \$20.00
Mammoth bulbs, 9-11 in. cir. Each \$0.40, Doz. \$4.00, 100 \$30.00
The short time required to bring this peerless Lily into flower renders it invaluable. The flowers are delightfully fragrant, pure waxy-white, and if cut when partially open can be kept for two weeks. Bulbs potted in September can be had in flower in December, if desired. A succession of bloom can be kept up throughout the winter by bringing in a few pots of bulbs from cold frames at intervals. Blooming plants in pots are suitable for Easter offerings and presents. Bulbs ready for shipment August to December.
Extra bulbs. 7 to 9 inch circum. This is the most popular size to grow as pot plants for decoration and equally as valuable for cutting. Bulbs should produce from 8 to 12 flowers.

Mammoth bulbs, 9 to 11 inch circum. These are usually grown for specimens in pots for exhibition and decorations. Each bulb should produce from 12 to 18 flowers.

Martagon Each \$0.30, Doz. \$3.00, 100 \$20.00

Martagon album Each \$0.50, Doz. \$5.00, 100 \$40.00
There are few more beautiful things than the white Martagon Lily. The appearance of these Lilies is graceful and delightful in the extreme. On slender stems 4 and 5 feet high, the numerous drooping, wax-like, white Turk's Cap flowers, with yellow tipped stamens, look fascinating. The small flowers are symmetrical in shape, with reflexed petals and are borne in pyramid-shaped clusters. The Martagon Lily does wonderfully well in the shade of trees, and the white variety is no exception in this respect. June flowering.

Monadelphum Szovitzianum Each \$0.60, Doz. \$5.75, 100 \$50.00
One of the finest Lilies and not difficult to grow. It reaches a height of 4 to 6 feet. As many as twenty flowers are borne on one stem of established bulbs, forming pyramid-shaped clusters. The flowers are drooping and of a thick wax-like texture, regularly recurved. They vary from a pale citron-yellow to a deep yellow. The first season planted, it sometimes does not show much growth above the ground, but the following season it will grow freely. It dislikes being transplanted. Early June flowering.

Pardalinum californicum Each \$0.25, Doz. \$2.50, 100 \$18.00
Rising to a height of 7 feet, carrying from 15 to 20 flowers with whorls of dark green leaves, the flowers begin to expand from the base of the clusters upward, producing a succession of expanded and opening flowers for two or three weeks. The petals are large, strongly recurved, deep orange, maroon spotted; tips of petals intense scarlet. Hardy and robust, does well in any good garden loam, well drained soil in sun or partial shade. July flowering.

11 inches and up Doz. \$3.00, 100 \$20.00

One of the most beautiful and one of the hardiest Lilies in cultivation—"Lilium Regale" is truly a Royal Lily, worthy of a place in every garden; it is a lover of loam and sunshine. A vigorous grower with sturdy stems, 4 to 6 feet high, densely covered with fine foliage. Center of flower flushed with yellow, shading to white at the outer edges; externally the flowers are streaked with brown on the "ribs", shaded through the almost translucent petals with a delightful pearly tint; the contrast between the color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. The Regal Lily is very floriferous and when thoroughly established, bears as high as eighteen and twenty flowers during the season. They succeed in any good, rich garden soil, that is well drained. Because Regal Lilies flower so easily from small inexpensive bulbs, we offer this variety in many sizes, to suit everyone's purse. We recommend however, sizes 6-7 inch, 7-8 inch and 8-9 inch circumference.

Rubellum Each \$0.40, Doz. \$4.00, 100 \$30.00

The flowers are funnel-shaped, milk-white internally with yellow throat, deep reddish brown externally; delightfully fragrant, on 4-foot stem. Late July or early August flowering.

Speciosum
One of the greatest favorites as a border Lily; of daring as well as beautiful form. The petals are well rolled back and are handsomely spotted, often branded with distinct color. The style is thrown out in a curved line of much grace and strength. The stamens boldly diverge from it. The anthers are conspicuous for their size and color and extremely delicate poise. In addition to all these attractive qualities, it has a strongly waved outline to the petals, which adds much to its beauty. It flowers through the late summer into autumn. The cultivation of this Lily is simple. It may be relied upon to prosper, sending up its flowering stems year after year in increasing numbers. August to October flowering.

Testaceum Each \$0.95, Doz. \$9.50
Also known as "Excelsum" and as the "Nankeen Lily." One of the choicest border Lilies. The dull apricot tone, almost a cafe au lait, set off by orange anthers, puts it in a color class by itself. It is the most graceful of all. It often grows 5 to 6 feet high. It is beautiful for every kind of garden use, but because of its tender coloring, must not be planted in a mixed border with brighter flowers. In combination with light shaded Delphiniums or with the Madonna Lily, which it resembles, it is most effective. It is also a good Lily for pot culture. It has the texture of *Lilium Candidum*, with reflexed petals. It does well under the same conditions as *Candidum*. June-July flowering.

Ophelia Three \$1.60, Doz. \$4.50, 100 \$35.00
A Rose that is admired by everyone; its flowers are held erect on long, stiff stems, are of perfect form, good size, and of a most pleasing, delicate tint of salmon-flesh, shaded with rose; very floriferous.

Padre Three \$1.60, Doz. \$4.50, 100 \$35.00
Copper-scarlet, with bright yellow at base of petals. Flowers semi-double, with 15 to 20, often curiously notched petals. Blooms with exceptional freedom.

President Herbert Hoover Three \$1.60, Doz. \$4.50, 100 \$35.00
Large flowers of a very charming combination of cerise-pink, flame, scarlet, and yellow, with broad, thick petals; very fragrant. The clean, handsome foliage is an added attraction. The brilliancy of the color is somewhat dimmed by hot weather, but the cool autumn nights develop tones and tints of almost unbelievable richness. Perhaps it will do best in partial shade.

Radiance Three \$1.60, Doz. \$4.50, 100 \$35.00
An ideal bedding Rose that continues to produce its large flowers throughout the most unfavorable hot weather when frequently many other varieties fail. A brilliant carmine-pink, with salmon-pink and yellow shadings at base of the petals.

Red Radiance Three \$1.60, Doz. \$4.50, 100 \$35.00
A counterpart of Radiance from which it is a "sport," possessing all the good traits of that valuable variety but differing in color, which is a bright cerise-red.

Rev. F. Page-Roberts Three \$1.70, Doz. \$5.00, 100 \$40.00
Copper-red buds of great length, opening to golden yellow blooms stained outside with red, fully double and very large; fragrant.

Schwabenland Three \$1.70, Doz. \$5.00, 100 \$40.00
The moderately fragrant flowers are large; over 5 inches in diameter, with high spiral center, the petals having a peculiar twist or curl. In color it is a luminous rich rose-pink, retaining its brightness until the petals drop. The flowers are carried singly on long, stiff stems. A strong, healthy, hardy, vigorous grower and free flowering.

Sensation Three \$1.60, Doz. \$4.50, 100 \$35.00
Enormous scarlet-crimson blooms of fine deep form; double, 30 to 35 petals of great size and substance; very sweetly scented. Plant is strong and active in sending up new blooming shoots. However, Etoile de Hollande is a great improvement over this fine Rose.

Souvenir de Claudius Pernet
(See Claudius Pernet, page 65).

Ville de Paris Three \$1.70, Doz. \$5.00, 100 \$40.00
Round buds of clear yellow and big, globular flowers of the same hue, untouched by any other color. This is one of the really distinct breaks in the new yellow Roses.

Vaterland Three \$1.70, Doz. \$5.00, 100 \$40.00
The most distinct dark colored variety yet introduced. A rich deep velvety scarlet-maroon and a splendidly formed high centered flower of remarkable keeping qualities. Willowmere Three \$1.60, Doz. \$4.50, 100 \$35.00
Superb buds and blooms of richest pink, shining with a yellow glow which seems to come from the heart of the flower.

Hybrid Perpetual Roses

Frau Karl Druschki Three \$1.60, Doz. \$4.50, 100 \$35.00
This is the ideal hardy white Rose; pure in color, perfect in form, strong grower and remarkably free flowering; superb in every way.

George Arends or Pink Frau Karl Druschki Three \$1.60, Doz. \$4.50, 100 \$35.00
This is a pink form of the popular white Frau Karl Druschki, possessing not only the exquisite form, large size, and remarkable free-flowering habits of its parent, but in addition to this, it is also highly perfumed.

Mme. Albert Barbier Three \$1.60, Doz. \$4.50, 100 \$35.00
Full, cupped flower of soft fawn-yellow, paling to white, with pinkish shades in the center, blooming throughout the season. Mrs. John Laing Three \$1.60, Doz. \$4.50, 100 \$35.00
Soft pink, of beautiful form; exceedingly fragrant and remarkably free flowering; always does well and stands very close to the top among fine Roses.

Paul Neyron Three \$1.60, Doz. \$4.50, 100 \$35.00
Dark pink of enormous size; perhaps the largest of all.

The flowers are of medium size, produced freely and are slightly fragrant. As a novelty the Rose will prove very interesting.

PATENTED CLIMBING ROSES

Blaze Each \$1.50, Doz. \$15.00
Hardy everblooming Climbing Rose which inherits the blazing color of Paul's Scarlet Climber and the everblooming habit of Gruss an Teplitz, thus combining the most attractive features of both its parents. It is a very vigorous climbing variety which will grow to considerable height.

Easlea's Golden Rambler Each \$1.25, Doz. \$12.50
U. S. Plant Patent No. 114. A new outstanding Climbing Rose from England, producing its comparatively large, double rich golden flowers in large trusses. An additional quality is a delicious fragrance. Gold Medal Royal Horticultural Society, July 1932. Awarded the Cory cup as the best new seedling climber or rambler Rose of British origin introduced in 1932.

Golden Climber Each \$2.00, Doz. \$20.00
A departure in Yellow Climbing Roses. Flowers always come solitary on stiff, strong stems, often 18 inches or longer, and are 4 to 5 inches in diameter, making a cut flower which has no equal. Handsome "vine" to cover a fence, trellis, porch, pergola or garage wall.

New Dawn Each \$1.00, Doz. \$10.00
(Everblooming Dr. W. Van Fleet). Identical in every way with its parent in size and formation of its flowers, color, etc., but blooms continuously throughout the summer and fall.

ROSA ROULETTI - Miniature Rose

Three \$1.70, Doz. \$5.00, 100 \$40.00
Probably one of the old Lawrenceana Roses popular a century or more ago. After being lost to cultivation for many years, a plant was found growing in an Alpine window-garden by M. Correvo, the Swiss rock garden authority, just a few years ago. It is rapidly attaining popularity as a rock garden "gem" and as an edging plant in front of Rose beds. The plant grows about 6 inches tall in bushy form, is healthy and hardy and blooms from early summer until frost. The tiny, rose-pink, quite double flowers are less than an inch in diameter.

POLYANTHA ROSES

Cecile Brunner Three \$1.70, Doz. \$5.00, 100 \$40.00
Small, exquisitely formed buds and flowers of light pink with yellow base in diffuse, graceful clusters. Perfectly formed miniature Roses of utmost grace and delicacy. Also called "Sweetheart Rose" and "Mignon Rose."

Chatillon Rose Three \$1.60, Doz. \$4.50, 100 \$35.00
Bright pink semi-double blooms with an illuminating touch of orange. The color lasts well. The trusses are of gigantic size, and the plant is both healthy and hardy.

Eblouissant Three \$1.60, Doz. \$4.50, 100 \$35.00
Glowing, dark red flowers of medium size, shaded heavily with velvety crimson. Large, compact trusses, borne on dwarf but robust plants, which bloom constantly.

Gloria Mundi Three \$1.60, Doz. \$4.50, 100 \$35.00
Bright orange-salmon flowers in huge clusters. Growth is vigorous and bushy. Splendid when planted in masses.

Lafayette Three \$1.60, Doz. \$4.50, 100 \$35.00
Large, semi-double flowers of striking light crimson; open, frilled form. Blooms very liberally in loose clusters.

Princess Juliana Three \$1.60, Doz. \$4.50, 100 \$35.00
A dainty, sweet combination of maiden-blush and peach and ivory. The florets are prettily waved, and strung along the branched sprays.

Hardy Climbing and Rambler Roses

American Pillar Doz. \$3.50, 100 \$25.00
A single-flowering variety of great beauty. The flowers are of large size, 3 to 4 inches across, of a lovely shade of pink, with a clear white eye and clusters of yellow stamens, and are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten.

Bess Lovett Doz. \$3.50, 100 \$25.00
Large, fairly full flowers of light crimson-red, cup-shaped, and borne in long-stemmed clusters suitable for cutting; sweetly fragrant. Plant very strong, exceedingly free flowering, with fine, glossy foliage almost immune to disease. Better habits than Climbing American Beauty but totally unlike it in color and form.

Chaplin's Pink Climber Doz. \$5.00, 100 \$40.00
Unquestionably the most important acquisition in climbing Roses since the introduction of Dr. W. Van Fleet. It is a cross between Paul's Scarlet and American Pillar, and like its parents is of vigorous growth, perfectly hardy, producing its large flowers, similar in size and form to Paul's Scarlet, profusely in strong trusses of from 8 to 12 flowers each, but in color a rich lively pink.

**HARDY CLIMBING AND RAMBLER ROSES—Continued.**

Climbing American Beauty Doz. \$3.50, 100 \$25.00
Its name is somewhat misleading, but it is one of the best climbing Roses. A strong, healthy, vigorous grower, frequently making shoots from 10 to 12 feet long, and good sized flowers for a climbing Rose that blooms so freely. Color a pleasing rose-pink; of splendid form, good substance.

Dorothy Perkins Doz. \$3.50, 100 \$25.00
Soft shell-pink; flowering profusely in large clusters. Very fragrant and lasting. A grand Rose in every way.

Dr. W. Van Fleet Doz. \$3.50, 100 \$25.00
A Rose, which on account of its dainty color and exquisitely shaped buds and flowers, appeals to everyone. The long, pointed buds are of a rich flesh-pink on stems 12 to 18 inches long. Splendid for cutting.

Flower of Fairfield Doz. \$3.50, 100 \$25.00
Also called the "Everblooming Crimson Rambler." Combines the beauty of the well known Crimson Rambler with the continuous-blooming habit, the new growth bearing large clusters of crimson blooms through the summer continuously.

Mary Wallace Doz. \$3.50, 100 \$25.00
A Pillar Rose, making a fine strong, self-supporting plant 6 to 8 feet high, with large, glossy foliage, blooming with great freedom in spring and bearing a large number of fine buds in the summer and fall. Flowers very large, generally exceeding 4 inches across; well formed, semi-double, of a bright, clear rose-pink with salmon base.

Mme. Gregoire Stachelin Doz. \$5.00, 100 \$40.00
The plant is of strong climbing habit growing 12 feet or more high and has large disease-resistant foliage. At the tips, the long pointed buds are crimson at first as the sepals divide, then the firm outer petals show splashes of carmine as the flower opens with an iridescent pearl-pink inside. Very fragrant.

Paul's Scarlet Climber Doz. \$4.00, 100 \$30.00
No other Rose, in any class, can compare with it for brilliancy of color, which is a vivid scarlet. Flowers are semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes. It is of strong climbing habit and perfectly hardy. One of the most popular climbing Roses.

Silver Moon Doz. \$3.50, 100 \$25.00
Different from all other Roses, with beautiful semi-double flowers, 4½ inches and over in diameter; pure white in color, petals of great substance, beautifully cupped, forming a Clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

Star of Persia Doz. \$7.00, 100 \$60.00
A brilliant new Rose with flowers on the order of the lovely old Harrison's Yellow; semi-double bright yellow, and about 3 inches across. It makes a striking low climber or pillar Rose from 8 to 10 feet high, bursting into showers of sparkling bloom in June. It does not fade and the flowers last several weeks.

White Dorothy Perkins Doz. \$3.50, 100 \$25.00
A pure white climber, identical with Dorothy Perkins except the color. Without doubt the best white climber.

Wichuraiana (Memorial Rose). Each 60c, Doz. \$5.00, 100 \$40.00
Pretty, fragrant single pure white flowers with yellow stamens followed in fall by bright red hips or berries, a good climber where no great height is required, especially valuable for a trailing plant, forming a dense mat of almost evergreen foliage.

Mary Wallace.

Hardy Plant and Alpine Plant Seeds

Fresh Seeds Gathered at Wayside Gardens

Several years of experience and the observing of results have proven to us beyond a doubt that seeds of Hardy Plants and Rock Plants produced under the more favorable American climatic conditions germinate better and are superior in every way over imported seeds. This fact has been so forcefully brought home to us that wherever possible we harvest our own seeds at Wayside Gardens for the propagation of our stocks. The great variety of plants grown by us (we can say without boasting that our collection of plants is the greatest ever brought together in one nursery in America) makes it possible for us to also offer a most complete collection of all American grown seeds of Hardy Plants and Rock Plants.

Several more varieties could be added to the list presented here, but we have omitted them because they are too difficult to handle for the amateur. The selection offered should give no great trouble to anyone who will be careful, but we cannot and do not give any guarantee as to results, knowing only too well that it requires more time, patience and care to raise hardy plants and rock plants from seeds than a great many people are willing to give. If, however, it is proven that failure is due to the seeds, we will replace them with others, without charge.

Many seeds offered are not only rare but scarce, therefore, send your order early.

(Packets contain liberal quantities of seed).

Special Wayside Gardens Plant Food

So many visitors coming to see our hardy plants in bloom, and noticing their sturdy growth and abundant healthy foliage, were constantly asking us what special plant food we used, and where they could get it, that finally we had to do something about it.

So we decided to offer to our customers the same plant food we use. It does cost more than regular fertilizers. But you are perfectly willing it should, provided you can get the fine results with your plants that we do with ours.

What It Is

Bear in mind that this Special Plant Food of ours is a food and not just a stimulant that crowds the plants, causing soft growth, lacking in sturdiness. It's a food that nourishes and invigorates the roots as well as the tops over an extended period.

Wayside Gardens Plant food remains available in the soil for a long time, slowly disintegrating. Never causes indigestion. It's a food rich in organic matter that has all the merits of the best of rotted manures, and still is in a form as easy to use as the usual fertilizers.

Just such a food is Wayside Gardens' Special. The same food that has proven so resultful for us in growing plenty of strong roots, sturdy stalks and an abundance of finely colored full sized blooms.

How to Use It

Wayside Gardens Special Food is easy to use. The directions are simple. The same as we follow. If your garden is an established one, apply twice a year, March first and September first. Use 15 to 25 pounds for top dressing a space of 500 square feet for hardy plants, rock plants, roses, annuals and other flowering plants, shrubs, and bulbs.

In making a new garden, double the amount and mix with the soil. Planting may be done at once. No burning is possible. For old lawns use 10 to 25 pounds for top dressing 500 square feet. In making new lawns use double the amount and mix with the soil. Seeding may be done at once. No burning effect will result.

For potted plants, a 3-inch pot full of the food, mixed with a bushel of soil will give you splendid results.

50 lbs., \$3.00; 100 lbs., \$5.00; 500 lbs., \$17.00; 2000 lbs., \$65.00.

Full directions in every bag.

Can only be obtained direct from Wayside Gardens.

Wayside Gardens Plant Food is sold only in the following states: Illinois, Michigan, Ohio, West Virginia, Kentucky, Massachusetts, District of Columbia, Pennsylvania, New York, New Jersey, Virginia, Indiana, and Rhode Island.

The ratio of concentrate to water flow is controlled by simply turning the handle to the calibrated figures on the jar-top, a constant proportion thereby being maintained. The nozzle is adjustable from a fine fog spray to a straight stream for spraying the tops of trees. The **Hydro Mixing Nozzle** is constructed entirely of brass, the outside beautifully chromium plated. There are no moving parts to wear.

The heavy brass cap is recessed to hold the gasket, and threaded to engage the heavy brass collar on the tank. There is also an air release that relieves the air in the tank if the operator attempts to remove the pump while there is pressure in the tank. The pump handle is in the form of a large "D". The 22-inch high-pressure discharge hose is fastened to the supply tube by means of a hose clamp, and is supported by a wire coil spring at the connection. The automatic shut-off is of high quality brass; and the brass extension is a full 20-inch length with standard $\frac{1}{4}$ -inch pipe threads on both ends, enabling the operator to thread two or more lengths together to form a longer extension. Extra spray discs for fine and coarse sprays and solid stream are furnished with the angle nozzle. Shipping weight, 8 pounds.

INSECTICIDES

Red Arrow Spray

KILLS ALL PLANT PESTS

The Most Highly Concentrated Pyrethrum Insect Spray on the Market

Red Arrow is an exceedingly powerful non-poisonous insecticide, especially adapted to agricultural and horticultural purposes, both under glass and in the open. Very effective against insects in poultry house, kennel, and dairy barn. Also deadly for worms, beetles, and ground insects.

Does not burn or stain flower, leaf or fruit. When used on fruits and vegetables, it eliminates washing because with Red Arrow there is no poisonous residue.

Red Arrow is as nearly a perfect spray as you can buy because it will kill 100% of more varieties of insects than any other non-poisonous insecticides. Deadly to insects—but harmless to children, pets, valuable wild bird life and soil.

Red Arrow is pleasant and easy to use. It has no dangerous fumes or unpleasant odors and needs only to be mixed with water.

1 ounce, \$0.30; ¼ pint, \$0.90; ½ pint, \$1.50; 1 pint, \$2.75; 1 quart, \$5.00; 1 gallon, \$15.00.

Ant Killer or Ant Bait

For Quick, Permanent Relief from Ants, Roaches, Silverfish

CLEAN. LETHELIN JELLY is a clean odorless ant bait, packed in handy tubes for your convenience. It does not melt or run at ordinary temperatures.

SCIENTIFIC. The sense of taste is highly developed in ants. They detect arsenic, sodium fluoride, and other poisons commonly used in liquid baits, powders, etc., and often quit feeding before the colony is destroyed. The toxic ingredients in LETHELIN JELLY are tasteless, and are so combined with attractive agents, that the ants prefer it to their favorite foods, eating voraciously until the last trace of bait is removed, or the colony wiped out. Strong, instantaneous poisons, or sprays which kill only the surface ants, leave the queen in the nest to lay eggs undisturbed, and fail of their purpose. The gentle toxic action of LETHELIN JELLY gives the workers ample time to carry the tempting "food" back to the queen and young—in the nest—thus destroying the colony at its source.

Garden Size. For severe infestations, indoors or out. \$0.45.

Estate Size. For golf courses, estates, greenhouses, etc. \$1.50.
